Hypersonic Technologies Moves Headquarters *Engineering & Tech Company expands to Dupont Circle Drive; will add 18 jobs* **Open House to Follow Ribbon Cutting**

Fort Wayne, Ind. (March 23, 2010) — Hypersonic Technologies has announced that it has expanded and moved its headquarters from 3400 East Coliseum Boulevard to 9933 Dupont Circle Drive West, located in northeast Fort Wayne. The company, which acquired Inertia North America and Voom Software, will also add 18 new positions by 2011. Hypersonic will continue to serve Voom and Inertia's existing clients while adding staff in order to focus on growth opportunities.

“We believe now is absolutely the best time to make this investment in order to better serve our customers,” said Allen Renfrow, President - Engineering of Hypersonic Technologies. “Leveraging the acquisitions and expansion, we will have all the tools needed to focus on the next step for Hypersonic Technologies. The investment we are making today will allow us to meet the needs of future and existing clients.”

Due to the expansion, the company will be adding positions in graphic design, software engineering, and software developing, as well as positions for electrical and mechanical engineers. These will be high paying jobs in the growing advanced technology sector. Hypersonic Technologies will also begin to focus on electric drive systems for renewable energy for automotive and telecommunication applications.

“The expansion of Hypersonic Technologies is good news times three,” said Fort Wayne Mayor Tom Henry. “It signifies growth in the high-wage advanced technology sphere, growth and investment within an existing business and growth in our small-to-mid-sized business sector, where most new jobs take root. In these difficult economic times, this homegrown success keeps us energized in our ongoing work to make Fort Wayne and our region the most attractive place for business development anywhere.”

The company has received an \$11,000 grant from the City of Fort Wayne to use toward its expansion. Hypersonic Technologies will hold a ribbon cutting ceremony at its new facility tomorrow at 3:00 P.M.
